

Industrial Products

AtmosAir™ Solutions industrial products are available to suit the specific needs of each facility. Not only do they purify indoor air, but outdoor air as well. Our exhaust emissions control products can help small and large facilities conform to all regulatory agencies' exhaust requirements. Best of all, our systems can help drastically lower operating and maintenance costs. Please find below some examples of our industrial products.

ATMOSAIR 500E/500F

Voltage 110V/220V

Energy Use 33 Watts

Number of Tubes 5

Tube Size E/F

Capacity 8,000/10,000 cfm

Application In duct unit for larger central HVAC systems. Ideal for office buildings, hospitals, schools, nursing homes, childcare facilities, food processing facilities, manufacturing plants and sewage treatment plants.

ATMOSAIR CUSTOMIZED SCRUBBER

Voltage 110V/220V/480V

Energy Use per capacity

Number of Tubes varies

Tube Size varies

Capacity per spec

Application Custom engineered to meet the needs of manufacturing facilities, sewage treatment plants, and other large scale operations that purify the air prior to exhaust or recirculation.

CUSTOM INSTALLATIONS

Sample of customized sheet-metal housing for multiple ionization units to supply high ions volumes within areas of high intensity VOCs and odors

Industrial Products

ECO-DUCT

Flexible, plastic ducting systems used to evenly diffuse ions throughout an area. Ideal for harsh environments or where static electricity is an issue.

ATMOSAIR ROOFTOP SCRUBBER

Sample of customized rooftop to eradicate offensive and/or toxin fumes prior to escaping to the outside environment & neighborhood
