

## Consumer/Residential Products

AtmosAir™ Solutions products are available in both self-contained stand alone units and in-duct models that are installed directly into residential central HVAC systems. Our products range in application from 500 sq. ft. to several thousand sq. ft. and everything in between to suit smaller individual rooms (bedroom, smaller den/living rooms, pantry) or larger areas (open floors, basements, etc). Some models are ready off the shelf for straight installations while other projects require a customized solution. Please find below some examples of our commercial product line:

### ATMOSAIR T400
